## **Lower Sand Creek Basin Soil Borrow**

## **Quick Facts:**

- 60,000 cy soil available for borrow at Lower Sand Creek Basin.
- Nearby Upper Sand Creek Basin has another 110,000 cy for a total yield of 170,000 cy.
- Lower Sand Creek Basin site will be opened once Upper Sand Creek Basin material has been removed. Lower Basin Site is available in late 2012 and April through October 2013.
- Lower Sand Creek Basin is located 0.7 miles east of SR4 Bypass and just north of Sand Creek Road. See figure below.

- Publicly owned site has been used for borrow since mid-1990s.
- Full geotechnical report with test pits and boring logs available.
- Habitat Conservation Plan inventory underway. Full HCP clearance expected summer 2012.
- CEQA coverage already complete.
- Soil characterization analyticals available.
- Summary of encroachment permit terms: District to provide staking, payment of HCP fees and as-built survey. Contractor to prepare SWPPP, implement BMPs and follow provided grading plan. For complete terms, please see draft permit on district's website.
- Upper Sand Creek Basin material must be removed before Lower Sand Creek Basin is opened for borrow.
- Flood Control District cannot warrant suitability of material for contractor's purpose.
- For full details or more information, please visit the Flood Control District website:
